Abstract of DE19916267

The invention relates to a method for monitoring or influencing the movement of a vehicle on a path. According to said method, a desired path (40) and an actual movement (41) of the vehicle are determined, said desired path and said actual movement are compared (43), and an information variable (45) is conveyed to the driver of the vehicle by haptic means according to the result of the comparison or at least one wheel brake is controlled according to the result of the comparison.

40 ... DETERMINE DESIRED PATH
 41 ... DETERMINE ACTUAL PATH
 42 ... DETERMINE DESIRED MOVEMENT
 43 ... DETERMINE THE DIFFERENCE BETWEEN THE DESIRED MOVEMENT
 AND THE ACTUAL MOVEMENT
 44 ... DETERMINE INFORMATION VARIABLE
 45 ... TRANSMIT INFORMATION VARIABLE
